

WORK IN THE AGE OF INTELLIGENT MACHINES

RESEARCH COORDINATION NETWORK

- Funded by the US National Science Foundation to coordinate research on the human-technology frontier (NSF 17–45463)
 - Co-PIs Kevin Crowston, Ingrid Erickson and Jeffrey Nickerson
- Goal: Build a network of interested researchers to facilitate “disciplinary convergence” to address the topic
- Disciplinary convergence (an NSF “big idea”)
 - Research driven by a specific and compelling problem (work and intelligent machines)
 - Deep integration across disciplines by developing common frameworks and new scientific language

WAIM RCN

- **Activities**
 - Workshops at Academy of Management, HICSS, ECIS and others
 - Annual conference (1st held at Michigan State University in May 2018)
 - Infrastructure: <https://waim.network/>, listserv, @WAIMRCN on Twitter
- **How we'll know it's a success**
 - The network facilitates joint projects that build convergence
- **A network's strength is its members, so join today!**
